

# NAILHEADS™ & RHINESTONES

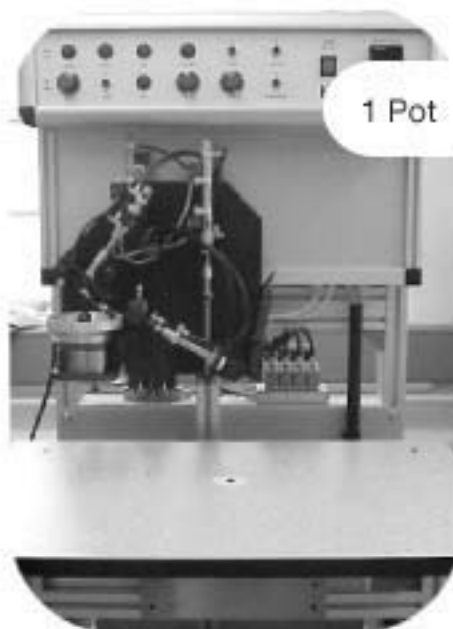

## Variomat Series

### The Process

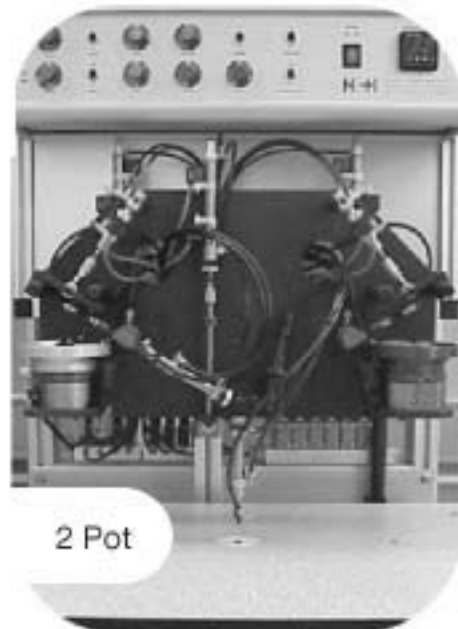

- Capable of welding items such as rhinestones, beads, rivets in different sizes and colours directly onto a material
- Stones are supplied to the setting stamp from a conveyor-pot and the item being welded onto is put into position by hand
- Setting process is released by the simple foot pedal
- Items ranging from diameter 2mm (0.079 in) to 8mm (0.315 in) are usable
- Different pots are used for different stone sizes.
- Depending on the material being printed on, the Variomat models can set up to 3500 pieces in an hour.
- A 2-pin-euro plug is installed for the power connection with a main voltage of 230v.
- A compressed air connection must be supplied.
